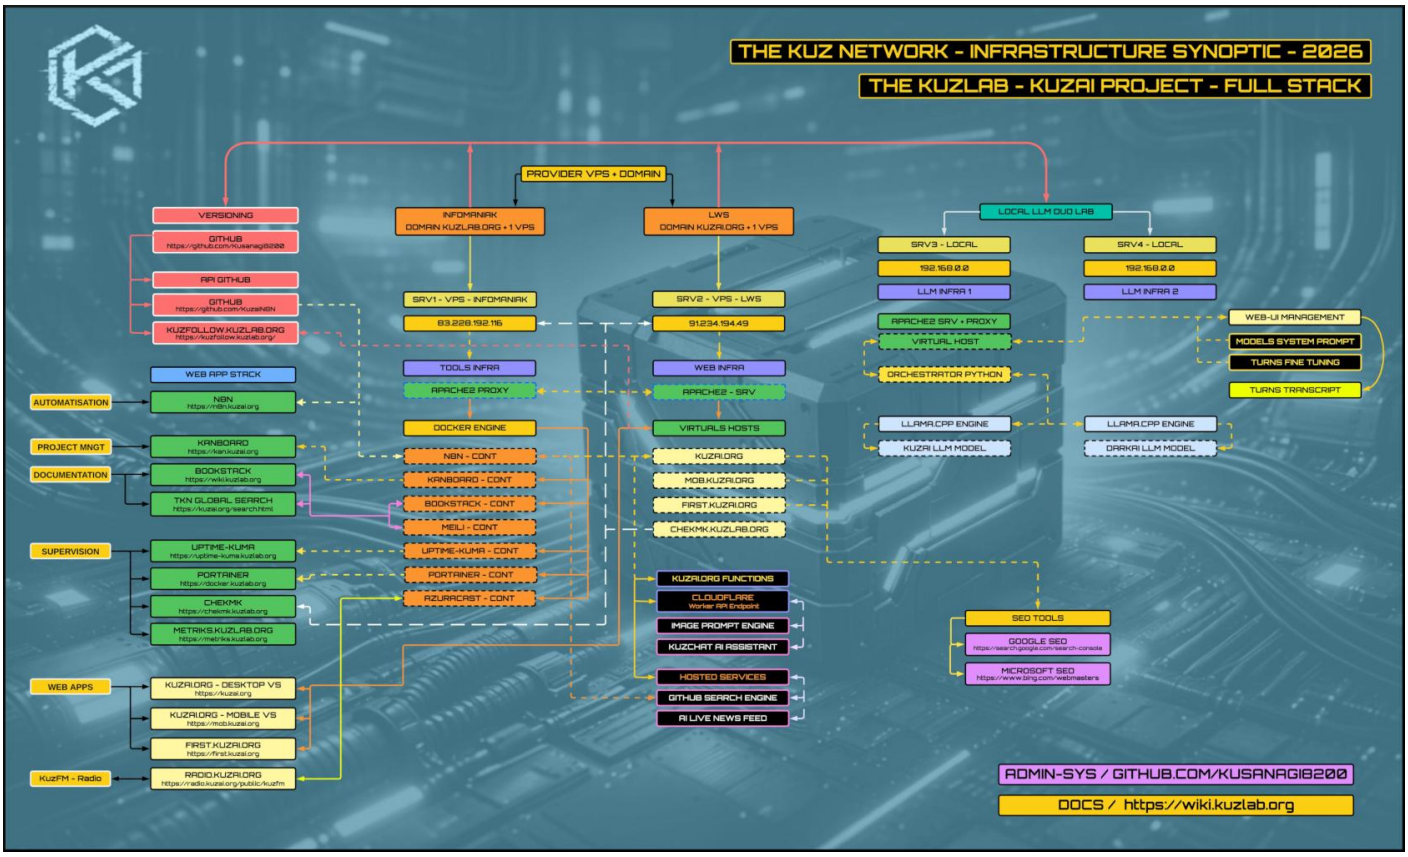
THE KUZ NETWORK - INFRASTRUCTURE

THE KUZLAB - INFRASTRUCTURE (IN REVIEW)



THE KUZLAB - INFRASTRUCTURE (IN REVIEW)

Last updated --> 2026-04-08

This page describes the current infrastructure for The KUZ NETWORK

Servers, domains, public websites, internal tools, and how everything fits together.

---

1) OVERVIEW

- ONE LOCAL AI SERVER (LLM TEST BENCH --> NOT PUBLICLY EXPOSED)
  - LOCAL LLM DUO CHAT STACK INSIDE THE LAB --> SRV3 + SRV4, LOCAL ORCHESTRATION, DUAL LLAMA.CPP ENGINES, LOCAL WEB-UI MANAGEMENT, PROMPT / TURNS / TRANSCRIPT WORKFLOW

- TWO DEBIAN VPS
  - VPS 1 - INFOMANIAK (83.228.192.116) --> DOCKER HOST, INTERNAL TOOLING, DOCUMENTATION, PROJECT MANAGEMENT
  - VPS 2 - LWS (91.234.194.49) --> APACHE2 FRONT FOR PUBLIC WEBSITES

DOMAINS

- KUZAI.ORG → PUBLIC PORTAL + PRODUCT SUBDOMAINS
- KUZLAB.ORG → INTERNAL TOOLING / INFRASTRUCTURE

---

2) COMPONENTS & PURPOSES

2.1 LOCAL SERVER - AI SERVER (LLM LAB)

- PURPOSE --> MODEL LOADING, BENCHMARKING, RAG/AGENTS POCS, WITHOUT TOUCHING PRODUCTION
- EXPOSURE --> LOCAL / LAB ONLY (NOT PUBLIC)
- LOCAL LLM DUO CHAT --> DUAL LOCAL INFERENCE / CHAT STACK WITH SRV3 AND SRV4, DESIGNED FOR MULTI-MODEL CONVERSATION FLOWS, SYSTEM PROMPT MANAGEMENT, TURN STORAGE, TRANSCRIPT GENERATION, AND LOCAL FINE-TUNING PREPARATION
- SRV3 - LOCAL / LLM INFRA 1 --> APACHE SRV + PROXY, VIRTUAL HOST, ORCHESTRATOR PYTHON, LLAMA.CPP ENGINE, KUZAI LLM MODEL
- SRV4 - LOCAL / LLM INFRA 2 --> LLAMA.CPP ENGINE, DARKAI LLM MODEL
- DUO CHAT MANAGEMENT LAYER --> WEB-UI MANAGEMENT, MODEL SYSTEM PROMPT, TURNS FINE TUNING, TURNS TRANSCRIPT
- LOCAL FLOW --> WEB-UI → APACHE / VHOST / PROXY (SRV3) → PYTHON ORCHESTRATOR → LLAMA.CPP ENGINES (SRV3 / SRV4) → LOCAL MODELS / TRANSCRIPTS / TURN DATA

2.2 VPS INFOMANIAK - 83.228.192.116 (DOCKER + TOOLS)

- HOST OS / ROLE --> DEBIAN; DOCKER ENGINE FOR INTERNAL SERVICES + MONITORING

Services

- PORTAINER - https://docker.kuzlab.org
  Docker administration (stacks, images, logs, deployments).
- N8N - https://n8n.kuzai.org
  Workflow engine for AI news harvesting & GitHub search that feeds KUZAI.ORG.
- UPTIME-KUMA - https://uptime-kuma.kuzlab.org
  Availability monitoring (HTTP/HTTPS), alerts, uptime history.
- WIKI (BOOKSTACK) - https://wiki.kuzlab.org
  Central documentation (procedures, access, architecture, checklists).

- AZURACAST / KUZFM RADIO - https://radio.kuzai.org/public/kuzfm
  Radio backend / public stream service for KUzFM,.

2.3 VPS LWS - 91.234.194.49 (APACHE2 WEB FRONT)

- HOST OS / ROLE --> DEBIAN; APACHE2 SERVING PUBLIC WEBSITES

Public websites

- KUZAI.ORG (DESKTOP) - https://kuzai.org
  Universal AI Index - desktop experience.
- MOB.KUZAI.ORG (MOBILE) - https://mob.kuzai.org
  Universal AI Index - mobile-optimized.
- FIRST.KUZLAB.ORG (CNRS CLONE) - https://first.kuzlab.org
  Reference clone of the CNRS "First" website.
- KANBOARD - <https://kan.kuzai.org --> 9443>
  Project management (kanban, backlog, roadmaps) served via Apache2 on this VPS.

2.4 SOCIAL & VERSIONING

- GITHUB (GENERAL) - https://github.com/kusanagi8200
  General versioning for The KUZ NETWORK.
- GITHUB (N8N) - https://github.com/KuzaiN8N
  n8n workflows & automations.

---

3) HOW IT FITS TOGETHER (FLOW)

1. CODE & CONTENT ARE VERSIONED ON GITHUB (GENERAL + N8N).
2. N8N (INFOMANIAK) HARVESTS/CURATES DATA (E.G., AI NEWS) → FEEDS KUZAI.ORG.
3. PUBLIC SITES ARE SERVED BY APACHE2 ON THE LWS VPS.
4. UPTIME-KUMA (INFOMANIAK) MONITORS ALL EXPOSED FQDNS (ALERTS/HISTORY).
5. KANBOARD DRIVES PROJECT EXECUTION; WIKI IS THE DOCUMENTATION SOURCE OF TRUTH.
6. AI SERVER REMAINS THE SAFE R&D PLAYGROUND FOR LLMS.
7. RADIO.KUZAI.ORG / KUZFM EXPOSES THE PUBLIC RADIO ENTRY POINT, BACKED BY THE AZURACAST STACK VISIBLE ON THE INFOMANIAK SIDE OF THE SYNOPTIC.
8. LOCAL LLM DUO CHAT RUNS LOCALLY THROUGH SRV3 + SRV4, WITH PYTHON ORCHESTRATION, DUAL LLAMA.CPP ENGINES, MODEL-SPECIFIC PROMPTS, TURN STORAGE, AND TRANSCRIPT / FINE-TUNING WORKFLOWS.

---

4) SERVER TREES

INFOMANIAK - 83.228.192.116

```
Infomaniak (Debian)
├─ Apache2 (reverse/virtual host)
|
└─ Docker Engine
    ├─ Portainer                → docker.kuzlab.org
    ├─ n8n                      → n8n.kuzai.org
    ├─ Uptime-Kuma              → uptime-kuma.kuzlab.org/dashboard
    ├─ BookStack (Wiki)         → wiki.kuzlab.org/login
    └─ AzuraCast (Radio)        → radio.kuzai.org/public/kuzfm
```

LWS - 91.234.194.49

```
LWS (Debian)
└─ Apache2 (public front)
    ├─ kuzai.org                → Universal AI Index (Desktop)
    ├─ mob.kuzai.org            → Universal AI Index (Mobile)
    ├─ first.kuzlab.org         → “First” CNRS clone
    └─ kan.kuzai.org -->  9443        → Kanboard (project management)
```

AI SERVER (LOCAL)

```
AI SERVER (Local / Lab)
└─ LLM environments            → model tests, benchmarks, POCs (not publicly exposed)
   └─ Local LLM DUO Chat
      ├─ SRV3 - LOCAL           → LLM INFRA 1 / Apache SRV + Proxy / Virtual Host /
Orchestrator Python
      |  ├─ llama.cpp Engine
      |  └─ KUZAI LLM Model
       |
      ├─ SRV4 - LOCAL           → LLM INFRA 2
      |  ├─ llama.cpp Engine
      |  └─ DARKAI LLM Model
      └─ Local management       → Web-UI Management / Model System Prompt / Turns Fine Tuning
/ Turns Transcript
```

---

5) DNS SUMMARY

```
kuzai.org -->
  @ (apex)              → 91.234.194.49
  mob.kuzai.org         → 91.234.194.49
```

```
  n8n.kuzai.org         → 83.228.192.116
  kan.kuzai.org         → 83.228.192.116 (port 9443)
  radio.kuzai.org       → 83.228.192.116

kuzlab.org -->
  docker.kuzlab.org     → 83.228.192.116
  uptime-kuma.kuzlab.org→ 83.228.192.116
  wiki.kuzlab.org       → 83.228.192.116
  first.kuzlab.org      → 91.234.194.49
```

SOFTWARE INVOLVED IN THE INFRASTRUCTURE

This page lists the software, its purpose, and how components connect to each other.

SUMMARY (TABLE)

Software	Host / IP	Endpoints	Purpose	Connected to…
APACHE2 (WEB FRONT)	VPS LWS - 91.234.194.49	`https://kuzai.org`, `https://mob.kuzai.org`, `https://first.kuzlab.org`	Serve public sites (HTTP/HTTPS)	Consumes n8n feeds; deployments from GitHub
APACHE2 (KANBOARD VHOST)	VPS INFOMANIAK - 83.228.192.116	`https://kan.kuzai.org --> 9443`	Expose Kanboard over HTTPS	Serves Kanboard; internal users access
DOCKER ENGINE	VPS INFOMANIAK - 83.228.192.116	-	Run internal containers	Hosts Portainer, n8n, Uptime-Kuma, BookStack
PORTAINER	VPS INFOMANIAK - 83.228.192.116	`https://docker.kuzlab.org`	Docker administration (stacks, images, logs, deployments)	Controls Docker Engine; used by admins
n8n (WORKFLOWS)	VPS INFOMANIAK - 83.228.192.116	`https://n8n.kuzai.org`	Automation --> harvest/curate, export feeds	Publishes feeds → kuzai.org / mob.kuzai.org
UPTIME-KUMA (MONITORING)	VPS INFOMANIAK - 83.228.192.116	`https://uptime-kuma.kuzlab.org/dashboard`	HTTP/HTTPS monitoring, alerts, history	Probes all public FQDNs
BOOKSTACK (WIKI)	VPS INFOMANIAK - 83.228.192.116	`https://wiki.kuzlab.org/login`	Central documentation	Linked with Kanboard; DB/uploads backups
KANBOARD	VPS INFOMANIAK - 83.228.192.116 (via Apache2)	`https://kan.kuzai.org --> 9443`	Project management	Internal users; referenced by the Wiki

Software	Host / IP	Endpoints	Purpose	Connected to…
AZURACAST / KUZFM RADIO	VPS INFOMANIAK - 83.228.192.116	`https://radio.kuzai.org/public/kuzfm`	Public radio / streaming service	Exposes radio.kuzai.org; backed by AZURACAST-CONT
GITHUB (kusanagi8200 / KuzaiN8N)	External	`https://github.com/kusanagi8200`, `https://github.com/KuzaiN8N`	Versioning code & n8n workflows	Deployment source for web front / Docker stacks
AI SERVER (LLM LAB)	Local (not exposed)	-	LLM tests (bench, RAG/agent POCs)	Push code/data to GitHub (as needed)
LOCAL LLM DUO CHAT	Local (not exposed)	Local Web-UI only	Dual-node local chat / orchestration layer	Uses SRV3, SRV4, Python Orchestrator, llama.cpp, KUZAI LLM Model, DARKAI LLM Model

---

DETAILS BY COMPONENT

APACHE2 - WEB FRONT (VPS LWS - 91.234.194.49)

- Purpose --> serve `kuzai.org`, `mob.kuzai.org`, `first.kuzlab.org` over HTTP/HTTPS.
- Connections -->
  - Inbound --> user traffic (Internet), content/data (n8n feeds over HTTP).
  - Outbound --> web responses; logs to admins.
  - Deploys --> artifacts/content from GitHub (per your deployment process).

APACHE2 - KANBOARD VHOST (VPS INFOMANIAK - 83.228.192.116)

- Purpose --> publish `kan.kuzai.org --> 9443` over HTTPS (dedicated vhost).
- Connections -->
  - Inbound --> internal users.
  - Outbound --> Kanboard UI/app, optional webhooks (if enabled).

DOCKER ENGINE (VPS INFOMANIAK - 83.228.192.116)

- Purpose --> runtime for Portainer, n8n, Uptime-Kuma, BookStack.
- Connections -->
  - Managed by Portainer (admin UI).
  - Exposes each service through its FQDN (HTTPS).

PORTAINER - `https://docker.kuzlab.org`

- Purpose --> Docker administration UI (stacks, images, logs).
- Connections -->

    - To Docker Engine (control plane).
    - Access --> admins (MFA recommended).

---

n8n - `https://n8n.kuzai.org`

- Purpose --> workflows (AI news harvesting, search, normalization), exporting feeds.
- Connections -->
    - Inbound --> public sources (HTTP).
    - Outbound --> kuzai.org / mob.kuzai.org consume feeds over HTTP.
    - Backups --> export workflows + persistent volume.

UPTIME-KUMA - `https://uptime-kuma.kuzlab.org/dashboard`

- Purpose --> monitoring HTTP/HTTPS endpoints, alerts.
- Connections -->
    - Probes all public FQDNs.
    - Outbound --> notifications (email/IM per config).

BOOKSTACK (WIKI) - `https://wiki.kuzlab.org/login`

- Purpose --> documentation and source of truth (procedures, access, architecture).
- Connections -->
    - Cross-links to Kanboard (projects/tasks) and internal resources.
    - Backups --> DB + uploads + `.env`.

KANBOARD - `https://kan.kuzai.org --> 9443`

- Purpose --> project management (kanban, backlog, roadmaps).
- Connections -->
    - Internal users; linked with the Wiki.
    - Optional webhooks to n8n (if you automate).

RADIO.KUZAI.ORG / AZURACAST - `https://radio.kuzai.org/public/kuzfm`

- Purpose --> public KUzFM radio page / streaming entry point.
- Connections -->
    - Public users access the radio page and stream entry point.
    - Backed by the AZURACAST stack shown on the INFOMANIAK side of the synoptic.
    - Can be exposed through the Apache / reverse proxy layer used for public access.

GITHUB - `https://github.com/kusanagi8200` / `https://github.com/KuzaiN8N`

- Purpose --> versioning of site code/scripts and n8n workflows.

- Connections -->
  - Deployment source for web front (Apache2) and Docker stacks (Portainer/compose).
  - History/PR/CI as needed.

AI SERVER - (LOCAL)

- Purpose --> LLM lab (tests, benchmarks, RAG/agent POCs) without impacting production.
- Connections -->

LOCAL LLM DUO CHAT - (LOCAL)

- Purpose --> dual-node local chat / orchestration environment for model-to-model and user-to-model conversation workflows without impacting production.
- Architecture -->
  - SRV3 - LOCAL / LLM INFRA 1
    - Apache SRV + Proxy
    - Virtual Host
    - Orchestrator Python
    - llama.cpp Engine
    - KUZAI LLM Model
  - SRV4 - LOCAL / LLM INFRA 2
    - llama.cpp Engine
    - DARKAI LLM Model
- Conversation / management layer -->
  - Web-UI Management
  - Model System Prompt
  - Turns Fine Tuning
  - Turns Transcript
- Connections -->
  - Inbound --> local-only UI / management actions.
  - Internal path --> Web-UI → Apache / Virtual Host / Proxy → Python Orchestrator → SRV3/SRV4 llama.cpp engines.
  - Outputs --> local prompts, turn history, transcripts, fine-tuning preparation data.
  - Exposure --> no public endpoint.

MAIN FLOWS (AT A GLANCE)

- Users → `kuzai.org` / `mob.kuzai.org` (Apache2 on LWS).
- n8n → publishes HTTP feeds → kuzai.org/mob.kuzai.org consume those feeds.
- Uptime-Kuma → probes all FQDNs and sends alerts.
- Portainer → admin for the Docker Engine (deploy/upgrade).
- Wiki ↔ Kanboard → documentation & project delivery (cross-linked).
- GitHub → single source of code/workflows (front & containers).
- AI SERVER → LLM experimentation (push to GitHub if needed).

- Radio / KUzFM → public access through `radio.kuzai.org`, backed by the AzuraCast service shown in the synoptic.
- Local LLM DUO Chat → local Web-UI / prompts / turns / transcript workflow routed through SRV3 and SRV4.

THE KUZ NETWORK - KUSANAGI8200 - @2026
